### MRS. PEARY'S ARRIVAL

The Female Arctic Explorer Now in Washington.

TO RETURN AGAIN NEXT SUMMER.

She Sars She Will Bring Rer Husband Back to Civilization When She Comes Home Again-Stories of an Insufficient Food Supply Depled.

PHILADELPHIA, Sept. 26.—The little steamer Falcon with the Peary relief party on board docked late yesterday afternoon at the Industrial Navigation company wharf, in the lower portion of this city. Long before the vessel reached her moorings thousands of people had gathered to welcome the little party of explorers. As soon as the Falcon was tied to the dock Mrs. Peary with her baby, Marie Ahnegito Peary, and an Eskimo girl, whom Mrs. Peary had brought with her from the Arctic regions, was escorted to a waiting coach and hurried to the Pennsylvania railroad station, where she boarded a train for Washington, the home of her mother.

An Associated Press reporter had a short interview with Mrs. Peary before she left the city. The brave little woman showed plainly by her manner that she is much chagrined because of her bu-band's determination to remain in the Arctic region. She declares she is going back again next Summer and bring her busband back to civilization if she has to drag him with Mrs. Peary appeared in elegant health, and the baby born amid icebergs, which is now a little more than a year old and a beautiful child, seems to be all the better for the rough life it has been compelled to lead.

Commander Bryant, who had charge of the relief party, says the expedition was a great success. "We made many valuable collections, the ethnological specimens being very rare. I think we have the finest series of photographs of life and scenes in the Arctic country that were ever taken.''

The party killed eight Polar bears and have the skins with them on the Falcon. They also have the skeleton of one of these animals. In addition they brought back about lifty Eskimo dogs.

All on many were very reticent. It was intimated by one of the men who was with Pears that several who came away would have remained with the explorer in the far north but for the scarcity of food. When asked if it was true that the explorer and his party had been compelled to est whale blabber the man declined to either confirm or deny the story. It is be-Heved, however, that Peary is threatened with a lack of food that may become serion. The Paleon will lead with coal and return immediately to St. John.

"It is not true," said she, "that we are walrus or whale bluober to help out the meat supply During the fall and spring deer were killed and used for food, and their skins were used for clothing. "The statement that we lett Lieutenant

Peary without adequate provisions for the coming winter is also without foundation. He is amply provided for, and as a precautionary measure had the meat from the Fa'con left at the place."

Mrs. Pears then briefly recounted the effort made by her husband to reach the northern coast of Greenland for the purpose of orthining it, and said he was compelled to turn back, after proceeding 125 miles, because of a sickness that troke out amont his dogs and rendered them uses less. Mr. Peary expects to undertake the work again next year. Mrs. Peary said her present expectation was that she would next year accompany the expedition that will go to the scale of her hus-

band's work The most important thing accomplished," said Mrs Peav, "was the discovery of the Iron montain, which Scr John Ross heard of in 115 and which all Arctic explorers since ten had looked for in vain. There were tree masses of this mountain, which we apparently of meteoric form ition

THE ROMANCE OF A WAIF. An Heiress to \$125,000 in the Poor House

at l'ittaburg.

PITTSBURG, Sept. 26.—A waif, said to be heiress to \$125,000, was claimed yesterday by a man who said he was a New York traveling salesman. The gentleman, who would not give his name at present, called on Mrs. Dora Henderson, of Lawrenceville, and told her that the 9-months'-old girl baby left with her on June 17 last was the sole heiress of its mother, who died in Brooklyn last week, leaving an estate valued at \$125,000.

Mrs. Henderson, who received the babe from a young woman calling herself Helen Smith, turned the little one over to the department of charities some time ago because she was too poor to care for it. The department will investigate.

GENERAL EZ-TA'S AMBITION

It Is to Form a Union of All Central American Republics.

SAN FRANCISCO, Sept. 26 -The interest of President Diaz, of Mexico, in Ezeta is said to be due to Mexico's desire for the formation of a general republic of Central American countries, believing that with it would end revolutions, which injure commerce and retard development.

"Ezeta intends to get aid from the Mexicans to regain his prestige in Sau Salvador," said Colonel Cienfuegos, who talked about the matter. "Most of his old soldiers will turn to his standard, for he is confident that he can overthrow his enemies. A revolution in San Salvador is always welcome, and the people will fight for Ezeta when they get the chance. But the general will go prepared to force his way as be desires.

"Yes, President Diaz, of Mexico, will support Ezeta as far as he can, and there is no doubt that all the circumstances are in his favor. The people in Mexico thoroughly understand Sau Salvador affairs, and they believe in the cause of Ezeta.

"If the general succeeds in this campaign (which he proposes to carry on vigorously immediately after his arrival in Mexico) the result will probably be the organization of one common republic of all the Central American states. All the governments except Gautemala are favorable to it Ezeta, however, is confident that even Gautemala will accede to the proposition, and that 'be result will be a strong and prosperous republic, in which the little wars and petty strifes of the several nations will be forever lost."

### TO EVACUATE PEKIN.

The Chinese Court Prepared for a Japanese Invasion.

THE EMPEROR MAY GO TO NANKIN.

That China Fears Japanese Occupation of Pekin Is Evidenced by the Fact That Arrangements Are Perfected for Possible Removal to the Capital of the South.

London, Sept. 26.—A dispatch from Shanghai says: It is reported that most of the Japanese men-of-war have left the Island of Ha: Yantau. Their destination is unknown, and there is great uneasiness here regarding their whereabouts and in-

The Chinese no longer claim that more than one Japanese vessel was sunk in the battle off the Yalu. They insist that a large Japanese cruiser was successfully rammed and sunk by the Chinese ship Chin Yuen before that vessel went down. The Chinese declare that this statement is supported by the testimony of eye wit-

Chinese agents in Europe and the United States have been ordered to purchase forthwith any warships that are obtainable. Two serviceable vessels were purchased at Buenos Ayres on China's account prior to the Yalu battle. Many vessels loaded with munitions of war are on their way here from Hamburg and other European ports.

Following a similar action recently taken by Japan orders have been issued from Tientsin directing that a register be kept in every district of the Japanese residents, who are still numerous.

The hostile feeling against foreigners at Pekin is increasing in bitterness. Soldiers insult and annoy them in the streets, and in many other ways is their position made

A Berlin dispatch to The Standard says: Telegrams received here from Pekin state that if the Japanese should occupy Pekin the emperor will withdraw with the court to Nankin. The viceroy of Nankin, the dispatches assert, has already been instructed to prepare for such an eventuality.

The Chinese emperors used to reside at Nankin, and it was not until the twelfth century that they removed to Kambalu. in order to have the rebellious Mongols better under their eye. Kambalu afterwards received the name of Pekin, that is, the capital of the north, whereas Nankin means the carital of the couth. Be-fore leaving Pekin his majesty will invite the diplomatic corps to follow him to Naukin, but it is believed that they will prefer to go to Shanghai, where they will have the European warships at their dis-

The Standard's correspondent adds The Japanese Prince Yamashina told some military men at Swinemunde the other day, on the occasion of his visit there to say farewell to Emperor William, that he based his hopes that Japan would be victorious on the excellent condition of the Japanese army and the abundance of money placed at the disposal of the government by the Japanese nonliny. He described the Chinese soniters as matter below the mark with regard to training,

arms and distance.

A distance to The Times from Tokio says North was known here of the reposter, - ...satul landing of Chinese troops in Yalu. The Japanese certainly signified the Chinese feet on the high seas, That streasports were seen either then or animum to chastement of troops were ready harded the transports probably kent c'ase to shore in comparatively shall low water, and on reaching the Yalu as cended it far enough to be invisible to vessels in the estuary.

MURPHY AGAIN ARRESTED.

Allegheny's Director of Public Safety Charged with Boodleism.

PITTSBURG, Sept. 26 - John R. Murphy, director of the department of public safety of Allegheny, was again arrested yesterday on a charge of malfeasauce in office. The prosecutor, as in the other case, which was ignored by the grand jury, is B. F. Gould.

The information made by Mr. Gould is exactly the same as in the former case. Director Murphy is accused of accepting money from different persons in return for protection furnished them in their operation of gambling houses and other illegal resorts. It is also asserted that he had permitted many other unlawful houses to exist with his full knowledge and passive approval.

In the former suit, after a true bill had been refused by the grand jury, Attorney Rowand intimated to the court that the jury had been tampered with by Murphy's friends. These charges are now being investigated by the district attorney. The new suit will come before a new grand jury for the December term.

Director Murphy said: "The witnesses who have been brought against me, and who testified in the previous case before the grand jury, are John Deeney, James Kelley and Samuel Russell. These men were forced to quit their business by my orders. This accounts for their enmity."

### WAITING FOR WHITNEY

New York Democrats Still Undecided on the Governorship.

JUDGE GAYNOR AGAIN DECLINES.

In Response to an Urgent Telegram That Gentleman Reasserts His Determination Not to Allow the Use of His Name-The Boom for Frederick Cook.

SARATOGA, Sept. 26.-"There is no situation, and there will be no situation until William C. Whitney arrives in New York and gives his ultimatum. If he says no, then there will be a hustle on the part of the prominent candidates, and undoubtedly the springing up of new candidates that would prolong the convention over Thursday," said a party leader last

This view of the situation is concurred in by every politician on the ground. The convention met in the Casino rink, where Governor Flower was nominated in 1891, at noon today. The decision of Mr. Whitney had not reached here before the convention met, so that the candidates in the field besides him have had little chance to work  $u_{\rm P}$  their individual booms, and will unitedly ask for an adjournment so that a canvass may be made. This will bring the nominations for governor late into the night, and following that will come the canvass for the offices of lieutenant governor and judge of the court of

appeals. For these offices few names have yet been mentioned and another recess will have to be taken until the third day, so as to allow the delegates to present the names which are as yet stored away in vest pockets. If Mr. Whitney says "no," Mr. Lockwood, of Buffalo, will come into the field as a prominent candidate against Frederick Cook, John Boyd Thacher and Judge Gaynor, and the fight will be a lively one. The friends of every one of

the candidates are extremely confident. The Gaynor boom, which languished because of the allegation that Judge Gaynor would not consent to run, and that his telegrams here Monday night containing such information was evidence of that fact, had a revival last night when the Associated Press gave the leaders a copy of a telegram signed by Judge Gaynor, in which he refuted all statements sent out from this place concerning his affairs. Accordingly another telegram was sent to the judge strongly urging him to allow the use of his name. To this an answer was received at midnight from Judge Gaynor saying that he cannot be a candidate for the nomination.

Lieutenant Governor Sheehan, when shown the message, said: "I presume that means that Judge Gaynor is still in the race. Well, the more the merrier."

The supporters of John Boyd Thacher are rather enthus, as ic over his chances, but at the same time some of them seem to be perfectly willing that he should accent second place on the ticket, provided Mr. Whitney's answer is aftermative, but

in the negative Mr. Thac ser is the logical garadote fue támis. The Logic ood boom is still in a state of apartity. Mr. Leckwo e will not ab-o-Intervile has his interact to, and the Erre

That is to say, that Mr. Cook whi either write a letter declining the n minath ner secretions it, as he may be told to do by Senater Hill, Mr. Murphy

or Lieutenant Governor Sheehan. The leaders are divided. As have been sa.d. Mr. Sheenah and Senator Hill favor Mr. Cook's cardidacy, while Tammany and Senator Murphy are for Whitney if Whitney will have it. Nothing can be determined and nothing will be done unin Mr. Whitney sleps his foot into New York city and answers definitely the query which she party I aders have to put to him. Mr. Girov and Mr. Grimmins and Senator Murphy are quite confident that Mr. Whitney will say yes, urging that the only reason that he declined before was because he believed that Governor Flower would take a renomination.

JUMPIN JOE OF CHEROKEE TOUCHES ON HIS SASSYPARILLY.

And the Audience Rises to Remark That They Have Had Enough -- Even the Magic Medicine Fails to Restore Joe to ills

Havin secoored the use of a tent, I gave one of my unrivaled exhibishuns in the town of New Zion and tharby cum to grief. I gin out, as usual, that my monster aggregashun would perform in the arternoon and evenin, with free admishun to all, and it ar' needless to add that the

to state in previ-GAME. ous edishuns, is Ramulus. The choice was between Ramulus and Cicero, and I saved Cicero for use later on. When the hog had played a two handed game of eachre by hisself and convinced the interested aujeence that thar was no decepshun, I was greeted with thunders of applause. I then stepped for'd and interduced my Magic cement and Cherokee sassyparilly in proper languidge. I never dwell long on the cement, though its varchews ar' many and no respectable fam'ly kin afford to be without it. Accordin to my usual custom, I was leadin up to the sassyparilly, which goes right to the vital spot if the vital spot hain't bin dead too long, when a feller gits up in the aujeence and calls

"Drop yer sassyparilly and start the panormy goin if ye don't want a fuss!"

I put my hand on my heart and bowed in my smillingest manner and went on to inform the cultivated attendance that the sassyparilly was made from roots gathered by my own hands and contained nuthin to offend the most fastidious. I felt that I was makin a deep and proper impresshun when another feller gits up and yells:

"Trot out the elephants and giraffes and clowns and let this yere circus begin with a bang"

I hey two objects in movin about on the face of the nirth and bringin my medical compounds to the notice of the sufferin public. The fust is that the public may suffer no more, and the second is to accum'late sufficient wealth to build a dam across Dog creek and a meetin house on Calamity hill. As fur my own wants, they ar' few, and I do not sigh fur the gaudiness of riches. Bowin low and humbly before that compound of enthoosiasm and intelligence on the benches and payin no heed to the keerless interrupshuns. I went on to say that my sassyparilly was calkerlated to freshen the blood, tone up the narves, work up an appetite and produce the gineral feelin in the busum of the de-

rayther stop in Cherokee than to jog along to paradise. I was handlin my subjeck in the most bewtiful manner and warmin up to that pint whar I allus calls fur a dyin man to step forth from the aujeence

when a human critter gits up and leaves his seat and cums down to me and sex: "Stranger, I feels it my solemn dooty to inquar what ye ar' givin us in return fur our enthoosiastic presence this arternoon." "I'm a-performin of my monster aggre-

gashun accordin to the bills outside," "What's sassyparilly got to do with yer monster aggregashun, as ye calls it?"

"She cums in when ye feels a goneness, a sadness, a feelin that ye want to be kerried out of Cherokee on the wings of a cyclone and dropped into the swamps of Arkan-aw and left to die of exposure. The very fust dose, if ye shake the bottle before takin, will make ye hoot fur joy, and arter takin the third ye wouldn't trade yer claim of sagebresh and alkali sile fur Central park in New York.'

' Heyn't ye got a panoramy of the Holy Land to wind off fur us" sez he, lookin kinder dangerous

"But what hev ye got outside of the eddecated hog, who hain't no better nor he should be, and I'll bet on it?"

"Thar's my exhibishum grasshopper,

who is a hym proof of the varchews of my Magic cement. Before the tender -1 ' hearted public get up on its car I used to break his q legs off and coyment tem on agin without his raisin شم any objeckshuns."

"Durn yer hopper!" he yells as he sees the fastidi-"T WAS A-WLARE," ous aujeence was with him and agin me.

"Then than's my jumpin frog," sez I, 'an inseck which kin outjump anythin he's put up agin except a kangaroo, and I hain't sayin he'd cum out behind at that, I'm a bettin on nine feet with no pertickler encouraigement."

Just consider. How much could you save in a year if you bought the cheapest and most worthless? And how far would it go toward paying for the things ruined in a single month? You can't save anything by buying cheap washing-powders. The way to save money in washing is proved to be absolutely safe. That is Pearline. Millions use it. 417

### WILSON TALKS.

Y Name is Wilson; I do an insurance business on LaSalle street, in Chicago Ill., and I live in Evanston, Ill. Evanston is what was originally a scattering population on a pretty point on Lake Michigan, esteemed years ago far from the city of Chicago, but now one of the varied towns which may go within it by vote of the population.

I am married and have a wife and one child. That child is a boy (I suppose I should feel the same solicitude if it was a girl), and I have a father's natural fancies as to what must be the best thing to give that child the right kind of intelligence, as to what must be the best thing to give that child the right kind of intengence, and so divert his course that he may succeed in life. I have studied a great deal upon the subject. My own experience would not be of great value, because I have succeeded only to the limit of the average man and am barely establish d; still, I succeeded only to the limit of the average man and am barely established; still, I own the house and lot upon which I live, and am feeling perfectly safe in meeting the exigencies of the year. I want the boy to take a broader view than I did, to be a bigger man in the world. I have studied how to teach him to do that, and he has done pretty well, as far as the preliminaries go. Now, I have thought over what I should say to him and have sometimes been puzzled. I could not very well tell him what I did not learn myself when I was of his age, and what my father did not know how to tell me, or also him what to do. I wanted to tell him what I needed but what I did not learn my-self when I was of his age, and what my father did not know how to tell me, or else was not thoughtful enough to do so. I wanted to tell him how to follow the example of those who have succeeded at the present time and under the circumstances which ordinarily affect a young man struggling in this Republic established on this com-paratively new world to-day. I wanted to tell him just what he had better do to get along well, and to point out to him what had been done by the people who were successful at the present time.

Of course, the record of the people of any time past would not be of so much valuc, because circumstances must necessarily have been different when they were alive. I feel confident, though, that if I could learn, some way and somehow, what the people who are so successful to day have done and how they did it, I could give to my boy such advice as would make his own life at least as far removed from fail-

to my boy suctradvice as would make his own life at least as far removed from lifting ure as justified by the natural ability he may possess.

I looked around for some authority which I might consult in order to give him the facts most essential with this idea of mine in mind, but I could find none until I discovered that a great publishing firm in Chicago had decided to bring out a book giving the photographs of all the people who are prominent in America to-day. Here was what I wanted. The book, as I have learned, is going to be published in 16 mosts. 16 pages to each with a recent photograph on each page of some active leadwas what I wanted. The book, as I have learned, is going to be published in 16 parts, 16 pages to each, with a recent photograph on each page of some active leading American man or woman of to-day, while underneath appears the story of that same person's life—the story telling what that person did, and how the ends attained were eventually accomplished. Here was what I wanted; here was what I needed in various ways; here was what I was certainly seeking in order to obtain the information with which to educate my boy ank secure for him that knowledge which will give him a source of thought and make him prominent in the world.

I have the first sheets of this work. It is a graphic story of America's Greatest Men and Women, told in each instance on a single page underneath a photograph of men and women, 'old in each instance on a single page underneath a photograph of recent date, which conveys to the eye an idea of what that person is. To me the photograph tells even more than the suggestive record beneath; and yet it is odd how in each instance the correct story corresponds with the expression upon the face which is reproduced in the portrait above. I do not know how the series will face which is reproduced in the portrait above. I do not know how the series will end. I know very little about this new feature of the newspaper people; I know nothing about the publishers and their expectations, but I do know this: that if the series so begun should be continued to its practical, ordinary good sense end—and I don't care whether that will include 200 or 700 of America's Greatest Men and Women, which is the title of the book—I do know this, that for the ordinary, active and alert business man—I will certainly say far more for the student or the literary man, or the politician or the statesman—for all these I will say it will be simply the most valuable and the most remarkable book produced in modern history. The man, or the politician or the statesman—for all these I will say it will be simply the most valuable and the most remarkable book produced in modern history. The wonder is that some one has not thought of it before. Yet no one seems to have done so since the days of Plutarch. Plutarch knew something. That shrewd old fellow knew that all who would get out of the drift, all who would accomplish great things, wanted to know every detail of the lives of those who had better luck or more courage or a broader brain than their fellows; but I am no authority on these points. I only know that there is produced a second Plutarch's Lives, that its biographies are shrewd, graphic and curt, and written without his and without biographies are shrewd, graphic and curt, and written without bias and without prejudice. I only know that there was a Plutarch—God bless the old fellow—and that there is this modern work.

This is the work I am going to give to my boy. I am going to make him read it thoroughly. The work is announced as consisting of 16 Parts, with 16 pages and 16 photographs in each part, and when bound, the whole series will make a great volume of 256 pages. The like of which has pages the reason the like of which has pages the reason that the reason the like of which has pages the like of which has pages to be a series will make a great volume of 256 pages. ume of 256 pages, the like of which has never been equaled. It is the story of the personal character of the men and women who are making the nation's history at this particular time. What a work this is! Do you imagine that I would miss it for my boy, or, incidentally, for mysel??

That specrit of fairness which kin allus be looked fur in the glorious west, even in a row between a roarin bull and a stun fence, was absent on this occashun. When I realized it, I started fur the door, but the crowd overtook me and toyed with me till I was a-weary, and a hull bottle of my sassyparilly failed to restore my lost enthooslasm. When the compound of intelligence had got through toyin with my karkass, I was taken into a court and to use what has been fined \$20 fur false pretenses. The crowd was ready to sw'ar to a man that they had bin basely deceived into believin that I was runnin a circus or a panoramy, and the justice of the peace happened to be the identical critter who bet agin my frog. Before I hold forth agin I shall hev painted signs to prevent fucher mistakes on the part of the confidin public, and I shall take the precaushun to deliver my lecktur from a spot whar I kin reach the door at a jump in case the enthoosiasm becums unbounded. Arter bein maltreated and robbed, as above described, I was permitted to recover the various reptiles and insecks and so forth belongin to my grand aggregashun and leave town. The aforesaid aggregashun is at present in a tired and dilapidated condishun, but I shall halt by the wayside and make use of my Magic cement and Cherokee sassyparilly to restore things to thar pristine glory, and hope by next week to feel the same varchewous ambishup which has heretofore accompanied me on my travels to relieve my sufferin feller men.

#### If He Was Rightly Informed.

I heard a story the other day of that now rare official, an old fashioned clergyman. He is settled over no church, but having been for a long time in one parish he has performed the marriage ceremony for two generations, and baptized as many. and is always asked either to tender the last rites to the dead or at least to assist

in that solemn office. He is always very comforting to the mourners, for the departed is sure of heaven. But as he grew older his prayers grew longer and tiresome. One day the mother of a little family died suddenly, and the bereaved husband sent for their regular minister and said: "I must invite old Dr. Blank, for he

married us, and my wife loved him, but I can't endure his remarks. I want you to give him a small part of the service to save his feeling -. The pastor thought he must give his senior the prayer, but judge of his chagrin

A sad looking gentleman, like a sort of very much retired Hamlet, with a painful expression of face, entered the coffee room of a country hotel the other day, holding in his hand a small canister.

"Look at this, gentlemen," he said sor rowfully. "I went into a gunsmith's shop to get something to cat, and the man handed me this can of powder. He said I could go and blow myself up. Professional actors were not wanted now-there's so many fine amateurs. I pledge you my word, ' said the tramp, holding the can within an inch of the grate in which a fire was burning, "I'm so miserable I've a mind to follow his advice."

"Dare you do it?" said a bystander, winking at the crowd.

The wretched party gave a sad, theatrical, lingering look and tossed the can into the fire.

The company yelled and rushed out of the place in all directions. When they filed in about 10 minutes later, the empty can was sitting harmle-s-

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and trufy beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and ievers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidbey-, Liver and Bowels without weakming them and it is perfectly free from very objectionable substance.

Syrup of Figs is for sale by all druggists in 50 cent bottles, but it is manufactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

PRIZE FIGHTS IN JERSEY-

Port Jervis Sports Go Over the Line to See Two Ring Contests. From the Port Jervis Gazette.

The sporting fraternity of this village and vicinity, representing about 300 people, witnessed an exhibition of pugilism between 11 and 12 o'clock Monday night. Two events composed the evening's programme, which was carried into effect in an open-air arena, a short distance from here, in New Jersey, The first event was a match between Kirby and White and was won by Kirby at the end of the sixth round. Robinson and Jennings fought for the most points in four rounds, at the end of which time Jennings was declared the victor.

Boating Resumed on the Canal-Good Yield of Buckwheat-Crop Conditions -Fall Pasture-Personal and Local

Correspondence Argus and MERCURY. -The rain cam in such great quantities that the boats, which had been detained by low water, were unable to run for a few days after the canal was full, because of high w ter in Rondout Creek. Everything is all right now and boats are running regularly again.

-Owing to the high water the mails are now carried to and from this place in a boat, as the road to the ratiroad is entirely under water.

-Fall pasture has improved wonderfully since the rain. The late mown meadows have a fine crop of aftermath which makes very fine, sweet pasture.

-If we can't brag much on corn and potatoes we can on buckwheat, as it is a very good crop around here. Arthur Grimes sowed two bushels and harvested sixty-two and one-half bushels of fine grain. If any one can beat this let us hear from them.

-Our apple crop is very poor this season. I am afraid we will not have cider of any account.

-The majority of our farmers have finished cutting their corn. It's a better crop than they expected. Potatoes are in general a poor crop, although some farmers have a very good yield, especially those that had them planted on low ground.

-A. Grimes, of the Half Way House, drove a well in his back kitchen. Athe depth of thirty-seven feet, he struck a vein of fine cold water. He has about nineteen feet of water in the pipe at present.

His House But Once

GEORGE H. THOMPSON O MACARDELL - - \* · CITY EDITOR J. F. BOBINSON. A E MICEINSON,

WEDNESDAY, SEPT. 26, 1894.

The New York Mail and Express, Republican, stops its calamity howl long enough to say: "The general business of the country, as measured by bank clearings, shows a gain of about twelve per cent. over the corresponding period of 1893. The railroad earnings also afford evidence of the large volume of internal trade in an increase of freight traffic, although the movement of passengers was naurally smaller than last year's, when the World's Fair was in full blast,"

Unless all signs fail Nathan Strauss, the philanthropist, whose practical benevolence has given the poor of New York cheap coal, cheap wood, cheap groceries and cheap milk, will be Tammany's candidate for Mayor. A better choice could not be made. He is a business man, not identified with the organization, is familiar with the city's affairs, possesses great executive ability, and his honesty and integrity are above suspicion. All factions of the Democratic party could be united in his support, and all citizens who honestly desire good government for the city would find in Mr. Strauss an ideal candidate.

Anti-Platt Republicans are agitated by the news that the big boss has decided to supplant William Brookfield, Chairman of the Republican State Committee, with Charles W. Hackett, who has been Chairman of the State Executive Committee for several years. Mr. Hackett is an out and out, thick and thin adherent of Platt and Mr. Brookfield has shown that he will not wear the Platt collar. The ostensible reason for the turning down of Brookfield is that he was opposed to the nomination of Morton and that it is due the candidate for Governor that his campaign should be entrusted to a man whose friendship, loyalty and interest in his election do not admit of doubt,

Ex-President Harrison and Gov. McKinley spoke, yesterday, at a mass meeting in Indianapolis. Their harangues were such as are ordinarily made on the stump for the purpose of "firing the hearts" of citizens and would not morit even passing notice were it not for the fact that they both declared that the tariff question was not settled and could not be settled until the Republicans are restored to power and have raised duties to the McKinley standard. This is a frank admission that Republicanism stands for a policy of agitation and consequent uncertainty and that the Republicans are willing to play fast and loose with the country's business interests and to make wreckand ruin of its prosperity in the hope of gaining a partisan advantage.

RIVAL TURN VEREINS.

Great Preparations for Physical Culture Being Made.

We are asked by Robert Wengatz to announce that a meeting of the Turn Verein will be held at his hotel on Depot street, Friday evening, at which the following gentlemen will be elected honorary members: Messrs. B. V. Wolf, W. C. F. Bastian, Henry Emde, Chas. Wolff, Sr., Dr. C. Collin and C. Schwartz.

The committee on rooms are negotiating for quarters in Empire Block,

We have been handed the following letter, with the request that it be published:

The Middletown Turn-Verein completed its organization, last night, at Wm. Vogel's hotel. All officers are elected and the organization is now ready for active work. The first turning will take place at Nicholson's Hall, North End, next Wednesday, Oct. 3rd.

A notice, published a week ago in the daily papers of this city, announcing the completing of the orranization of the Middletown Turn-Verein at "The Office," better known as Mr. Robt. Wengatz's saloon, has nothing in connection with this organization.

We take the liberty of stating that this association has grown out of the first and original movement as first published in the daily papers.

All good Germans are kindly requested to join us in our undertaking. The younger ones are especially requested to become active mem-

THE HOMEOPATHIC DOCTORS

Semi Annual Meeting of the State Medical reciety at the state Hospital-Many Interesting and Instructive Pa pers Presented.

The members of the Homeopathic Medical Society of the State of New York have every reason to congratulate themselves upon the success of their forty-third semi annual meeting, which has been in session for the past two days at the State Hospital in this city. A large number of prominent Homeopathic practitioners were present at the opening session, Tuesday, and the numbers were increased by many additional arrivals last night and this morning.

Among the physicians present are several who formerly resided in this city, or whose parents were residents of this vicinity. Among them are: Dr. Elizabeth Cor vin, of Binghamton, a sister of Mr. Henry C. Corwin, of near this city; Dr. Sayer Hasprouck, of Providence, R. I, a son of Mrs. Lydia Sayre Hasbrouck, of this city, Dr. Louis A. Bull, of Butfalo, a son of the late Dr. A. T. Bull, a native of the town of Crawford, and Mrs. Frances E. Minshull, formerly of this city.

Dr. Selden H. Taicott and the aseistant physicians of the State Hospital, Drs. Allen, Kinney. Arthur, Ashley and Barrus, are untiring in their efforts to make the visitors feel perfectly at home, and are here, there and everywhere looking after the comfort of the physicians from out

A bounteous lunch was spread in the rear of the Amusement Hall, and the proceedings of the opening sesston were interrupted by Dr. Talcott, who moved that a recess be taken "in order that 'garbage' (the subject under discussion at the time) might be dropped and lunch taken up."

The following excellent menu was then freely discussed:

Bouilion. Crackers, Escolloped Oysters.

Meat Sandwiches, Chicken Salad,
Bread and Butter Sandwiches,
Cold Meats, Olives, Coffee,
loc Cream, Cakes

A novel feature of the lunch was

the "Swedish Smorgasbord," table upon which was spread all the delicacies with which the people of Sweden are wont to tickle their palates. Dried salmon and herring, a salad made of various kinds of fish, several varieties of cheese, olives and other good things, were distributed about the table in artistic and inviting array.

AFTERNOON SESSION. Cigars followed the lunch and at 2.30 o'clock the programme for the

morning session was resumed. Dr. H. A. Paine read a most entertaining paper on the subject of "The

Communicability of Tuberculosis in the Flesh and Milk of Kine." This subject, and the manner in which it was treated by the doctor,

caused considerable discussion among the members of the society. We regret that lack of space will not hospital, who was one of the medical permit us to publish the paper and experts who testified to her insanity and the discussion which followed, both of which were instructive and The Bureau of Obstetrics was com-

posed of Drs. E. G. Cox, L L. Danforth, J. S. Halbert, B. S. Partridge and A Lenora White.

Dr. Danforth's paper was listened to with rapt attention and received much applause at its conclusion.

Dr. Harrison Willis, of Brooklyn, was invited to read a paper on the subject of Obstetrics, in which he described three very unusual cases, which had recently come under his observation.

Dr. E. G. Cox, of Albany, then read a paper entitled "The Insufficient Teaching of Practical Obstetrics," in which he called attention to the fact that young students do not have opportunities to practice obstetrics as they should before graduation.

None of the members of the Bureau of Materia Medica being present, the reading of a paper which had been sent in by one of its members was, upon motion, postponed until all those who had prepared papers and were present could be heard.

The Bureau of Ophthalmology and Otology was then given a hearing, the first paper being presented by Dr. Henry C. Houghton, of New York, his subject being "Aural Mas-

The secretary of the society, Dr. John R. Moffat, then took the chair, Dr. E. J. Bissell read a paper on "Strabismus," in which he gave many valuable suggestions to occulists and cautions to all who make much use of the eyes.

The final paper of the afternoon was read by Dr. C. H. Helfrich, of New York, on "Exostosis of the auditory canal;" operation with the dental drill. An adjournment was then taken until 8 o'clock.

During last night's session, the report of the Necrologist was read. Sketches of the lives of Drs. Lucien B. Wells and H. M. Dayfoot were read by Dr. E. Hasbrouck.

The Committee on Hahnemann statue then made some felling speeches and the chair appointed Drs. Wright, Smith and Lee a committee on collections. Members subscribed \$535.

Dr. Asa B. Couch paid an eloquent tribute to Samuel Hahnemann, whose bust, surrounded by plants and palms, adorned the stage. Drs. Talcott, Wright and Smith also spoke eloquently on the "master." Dr. N. Emmons Paine, of the Massachusetts Society, was given the privileges of the convention.

THIS MORNING'S SESSION.

The Bureau of Clinical Medicine and Pathology was given a hearing and also the Bureau of Surgery. Dr. H. A. Paine read a leng hy paper upon the "College of Physicians and Surgeons of New York," which occupied the attention of the meeting for the greater part of the morning.

At 12:30 an adjournment was taken, and the doctors were again the guests of Dr. Talcott at lunch, which was served, as yesterday, in the rear of Amusement Hall.

The afternoon session was devoted to papers from the Bureau of Neuro ogy, the Bureau of Paedology and the Bureau of Laryngology and Rhinology. NOTES.

Mr. John P. Dengler, of New York, the stenographer who reported the famous Buchanan case, is the reporter of the convention.

The treasurer of the society, Dr. Chas. Deady, of New York, was on hand to receive dues and the initiation fees of new members.

A large number of visiting physicians were quartered at the several hotels in this city and others at the hospital.

-Mr. F. O. Ernesty, representing the Boricke Homeopathic Pharmacy. of New York, is present with an exhibit of physicians' supplies, and Mr. N. E. Hurlbert, representing Tarrant & Co., of New York, has an interesting exhibit of the articles handled by that firm, chief of which are Tarrante' seitzer aperient, and Hoff's malt extract. The exhibits are in the corridor leading from the Amusement Hall to the library.

Dr. Ailison, the Superintendent of the at the trial, though firmly convinced of the woman's insanity, knew that the bugs, mutterings, incoherence and "general cussedness" of her conduct were not characteristics of the type of mania from which his star prisoner was suffering, and he quickly gave her to understand that he would have none of this nonsense and that the kind of treatment she received in the hospital would depend entirely upon her own conduct. There was at once a marked improvement in Mrs. Halliday's mental condition. She became quiet, tractable and decent and cleanly in speech and habits, and has continued so up to the present time. She is made useful and helpful in the work of the hospital, and is by all odds the best scrubwoman about the place, being careful and painstaking, and quite an artist with brush and pail.

She is allowed all the privileges that are granted other inmates of the hospital and at a concert given there, not long ago, by a company of singers from Newburgh, occupied a seat in the Amusement Hall and seemed to rather enjoy the interest with which the visitors looked upon her.

Some Personal and Local Notes of Interest-Concerning "Protoplastic Unergies" and the Effects, tpon Them of Cremation (From a Special Correspondent)

-A traveling photographer visited the various schools in town, yesterday, for the purpose of taking the pictures of the pupils.

-The Misses Annie and Sarah Coleman, who have been spending some weeks in the Adirondacks. returned to their home in village, yesterday.

-Rev. David Evans, of Middletown, and a number of his choir boys attended services at St. James' Church, on Sunday evening.

-The regular monthly meeting of St. James' Guild will be held in the chapel, on Friday afternoon, at 4 o'clock.

-A scientist has recently made the discovery that burying the dead is much healthier for the world at large than cremating them. This he explains in a clear but ghastly way by stating that the earth needs to be enriched and that a faiture to do so will "interfere seriously with the protoplastic energies of life." There are many who will thank that man of science for teaching them that word. Suppose, for instance, you have somebeen called lazy your friends and have heretofore felt when that tired feel-

ing was getting the bester of you that you must rouse yourself to exertion in order to escape such an imputation. Now you can lie back in your chair peacefully and, with closed eyes and folded hands, meet all remonstrances by gently murmuring that you feel your protoplastic energies being interfered with on account of the undue amount of cremation now going on in the world. There are very few who could answer that convincingly. We all worry quite a tations a SOUVERIL OF little at times because we cannot do more toward regulating matters and things in general, but this new discovery may aid us in evening things up a bit. It we happen to have a friend who is too energetic, and there are times, in the early morning for instance, when that admirable quality seems out of place, -send him off to the neighborhood of a crematory and give the protoplastic part of him a chance to rest for a time. If, on the other hand, a person is by nature or circumstances inclined to be indolent, let him live in the 1m mediate vicinity of a cemetery. Undoubtedly this discovery will be of benefit to the human race in many ways of which the scientist himself never

#### TWO AMBITIONS.

The chief and first tendency of the army, individually and collectively, is to love all new arrivals. The second and lasting one is to pick them to pieces and to backbite them.

We loved Miss Rohan with true Christian spirit when she first came to the fort. It being the headquarters of the regiment and we having a band at our disposal, we gave her a serenade upon the night of her entrance upon military soil. The style of the serenade was largely in what our colonel called "Q minor," being his way of expressing "ultra classic." The programme had been arranged before we had had the pleasure of seeing Miss Rohan, and when we realized how entirely it was unsuited to her style there was no time to change.

We called on her in a body the night of the day that she came, which is the delightfully barbarous custom at military posts, like a lot of savages crowding about a newly arrived runner who brings news of the outside world. It is meant well. Most of the inane and annoying things that we do in the social body are meant well, which is their only excuse. Nobody stops to think that the travel stamed wanderer would like time to rid herself of the rubbed in coal soot and the alkali powder of the plains; that she would like the first impression to be a favorable one.

We sat within the tawdry little parlor while the band played symphonies and andantes under the window, and we watched the drop of new blood in our stagnant veins. It was not blue blood in the least. It was hearty and red and strong, but it was the better appreciated on that account.

We were four, the bachelor officers-I mean in the room—and one of us was undoubtedly doomed to become the prey of this young person. Which of us heaven had set its mark upon was not then to be guessed. Miss Rohan smiled on all alike. It was a generous smile, which showed two rows of teeth rather heavily upholstered in gold. They suggested that she had eaten a good deal of taffy and pickled limes in her very youthful days. As I see it now, in the light of cool reason, she would have made an ideal milkmaid, for she was plump and fair, her nose was crimson from exposure to the Arizona sun, her hair was an undecided blond, and her eyes were blue—real Irish blue; also, seen in the cool light of reason, her gown was more intricate than graceful. She had on a skirt ruffled quite to the waist, a fashion, it seems, among stout women, a very large flounce, if that is the name for it, falling from the shoulder and sleaves, which were simply hage. She was very much laced, too, which may have had something to do with her florid skin. One is pretty apt to notice a woman's feet. Her-were short and broad and exed in red slippers. As for her hands, they were square. I lemmed afterward that her hands ware her price. She would sit on the front perch every morning at guard mounting and manicure them. There was no hesitation in her manner nor in her yere -in fact she spoke loudly and

not always quite grammatically Then I looked at my three companions. Ther was Blake, who was fall, tair and he serie—the kind of man that women in a head over cars in love with, who stood and looked deep into there consult read therein the story of his life. He was the son of a New England farmer of the kind called 'good plain people," and he was about as manly and whole souled a fellow as

the cavalry held. Then there was Thomas, who was small and trim. He had enough concert. for a much bigger man, but then conecit is usually in inverse ratio to a man's proportions. He was of the cavalry, too, and he rode the largest horse in the garrison. As to his ancestors, they were Philadelphians, and, he led one to be-

heve, of good old Quaker stock. Also there was Bayard. Now, he was what any man with his name should be -we all know the old motto. And he was so blue blooded! His people were the very best that the United States affords. His mother-stern, refined, high souled old lady—was dead and had left to him her diamonds for his future wife. It did not even occur to her that he could many beneath him, so she gave him no deathbod warnings. His father, a tall and stately old general, with huge white mustache and a fondness for good wines, still lived in Washington, where he sat in the war department all day and at the Army and Navy club all night

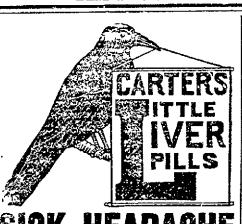

Now Bayard had not much beauty of feature, but he was well built and refined to the last degree. His ambition Wassomething unbounded. He was regimental adjutant now and could have had almost any detail or appointment he chose to ask for There was for him one arm—to lise is high as an officer may. He would have grand any rank, too, better than a good many others.

have not looked on the face of a your. woman for six months.

After guard mounting she went for a ride with Blake and Bayard. She sat her horse splendidly, although she did hold the rems in both hands, but that was a habit she had picked up from riding hard mouthed cart horses, she sweetly explained. Blake and Bayard took luncheon with her. We sat by and bet on the outcome In honor of the young lady's arrival

They Are Made by Sewing Women In the Employ of the Navy Department.

The natty uniforms of the sailors and marines of the United States navy are made by a corps of women employed by the quartermast reff the Brooklyn navy yard. They are well paid, and the position of tailoress or seamstress is eagerly sought for by women who carn a living by making garments. The waiting list if the bureau of employment contains riore than 100 applicants. All work is done by the piece, and the wages vary from \$3 to \$12 a week.

The applicant must present her name to the civil service board. Her application must be signed by at least two reputable persons. Not only must she come well recommended as a scamstress, but the condition of the workshop is arefully considered. The quartermaster makes it a point that no work shall be done in sweat-hops or in places where the clothing is likely to be infected.

Once appointed, the applicant visits the tailor shops of the navy yard, where she receives a bundle of goods to be made up into garments. The government furnishes all the trimmings and thread. From 20 to 80 bundles are issued every morning. It usually requires two days to finish the garments. The work is delivered and a new lot issued.

The overcoats are made of heavy cloth, and the maker receives \$2.80 apiece. Drawer- and undershirts for the men are made of 11 onnce and 7 onnce blue flannel. The seamstress is paid 15 cents for each. The maker is paid 66 cents apiece for cloth tronsers and 50 cents for working trousers. Over-hirts of heavy and light weight flannels pay 65 cents apicce. Jumpers are made of white drill-

ing at 50 cents each Some of these women have been in the employ of the Lavy yard from 15 to 20 years. The older employees are best paid and make rarely less than \$12 a

The garments are for the enlisted men only, as the officer supplies his own wardrobe. The uniforms are issued at the navy yard by the quartermaster.— New York Sun.

He Claims That He Taces Dangers Which Almost Unnerve Him.

When the railroad men left the cable car at the head of the Milwaukee avenue viaduct, the gripman threw the lever forward with an emphatic "zip" and said. Those locomotive engineers think they are the only men with nerve who ride on rails. Did you hear them talking about how veak they felt after their machine had just missed knocking some clum-y tarmer over the telegraph wire- and how they sweat a cold sweat when the haby toddled in front of their engine? Did you get onto their trick for a layoff because they have lost their nerve through running fast and can't make over 10 miles an hour until they get their nerve tack again's If those engineers would take this run, they would be wet through all the time and wouldn't have enough nerve left to sass a messenger boy.

"There are more kids to the acre up Milwaukee avenue than anywhere else in the city, and every last one of them plays in between the street car tracks. We have close shaves every block. Just like that Did you see that man then? He had plenty of time to wait for the three seconds it takes for us to pass, but he couldn't wait, and we grazed him. We don't run 60 miles an hour, but you can kill a man just as quick at 12 miles an hour, and it shakes you up just as much. There isn't a gripman in Chicago but dreads to make the down town loop during the rush hours Providence looks

after bubics and drunken men, and I beheve we have a special Providence with us. You peo be may think we have no feelings, but I have seen men run their grip cars into the barn and then sit down, weak as a cat and white as a sheet. An Ex-Knight of Labor Turns Lawyer, A Family That Has Achieved Olstine-

Terence V. Powderly, ex-General Master Workman of the Knights of Labor, was admitted, Monday, to practice in the courts of Lackawanna county, Pa. The papers on which he was admitted show that he was entered as a student in the office of I. H. Burns, in 1878, and read law for two years, until he was placed at the head of the Knights of Labor. For fourteen years and ten months he devoted himself to the affairs of the Knights, and after he was defeated for re-election in December, 1893, he resumed his legal duties. According to the constitution of the Knights of Labor, lawyers were the only class of men not eligible to membership in the order, and it is passing strange that the head of the organization for so many years should turn from it to the profession so discredited and despised by him and his followers.

It is not every family that can boast the distinction of having two of its members executed for murder | did it must remain as part of the in one generation. But the Wilson family of Western New York may ed in early and no "Owls" came nearperhaps be able to do this if matters do not miscarry. Monday, at Syracuse, Charles F. Wilson, brother of "Dink" Wilson, who was electrocuted last May for killing a detective. was convicted of the same crime, and sentenced to die in the electric chair the beginning of November.

THE FIRST TOUCH OF WINTER. Heavy Prost, Last Night-Snow and Ice in Sullivan County.

Last night was the first cold night of the season. The thermometer which began falling at sundown, sank rapidly as the night wore away the frost mark was reached, a very heavy frost forming in all this section. The lowlands in the vicinity of this city were white, this morning, and tender vegetation of all kinds was blackened and blasted. In this city many plants which it was intended to take up for house culture owners not expecting frost, having neglected to cover them.

Snow fell, last night, at Livingston Maror in quantity sufficient to whiten boards and bare places. The steps of the cars of the Sullivan County Express were still white with the fallen flakes when the train reached Wurtsboro.

At Liberty, at daybreak, this morning, the thermometer stood at thirtytwo degrees. The ground was slightly frozen and ice formed on small pools and vessels of water.

At Wurtsboro ice formed on pails of water and the frost was so heavy that gardens generally were destroyed.

Royally Entertained by Crystals—Nothing Left Undone by Their Generous Hosts-Seeing the Sights - A Night With the "Owls"-The Big Parade. Lots of Applause for Monhagens—The Mascot and "Colored Members"—The

From a Special Correspondent.

SCRANTON, Sept. 25.—This is a great town a.d Monhagens feel that they own a large share of it. Visiting firemen were never entertained more royally that we have been by the big hearted, open-handed members of Crystal Hose. They have done everything for us that the most generous hospitality could suggest, have stayed with us by day and sat up with us by night, have taken us to many points of interest in and about the city and are evidently determined that we shall carry away with us the pleasantest memories of our visit.

Last night we did a coal mine and a blast furnace and steel mills. It was an interesting and instructive experience and a great improvement over the night parades, which visiting firemen are usually put through as a preliminary to the big walk of parade day.

The "Owls" came out at 11:30 o'clock. What they did and how they unwritten history of this trip. I turnme, though I heard their hoots and screeches from the streets near the hotel. This morning I tried to interview some the fellows who flew about town with the "Owls," but they are not communicative. They don't act as if they had had a good time. I'm afraid Scranton "Owls" fiit about at too fast a rate for our steady Middletown boys to keep up with them.

This morning, we did the town on the electric railroad. Two handsomely decorated cars were placed at our disposal by the railroad company and we rode everywhere on them. The railroad system of this city is very complete and it is possible to reach all parts of the city by rail. As I have already remarked Scranton is a great town.

We had an early dinner at the Westminster, and at 1:30 lined up at Crystals' house for parade. Monhagen was the only visiting company, and we were given the right of line. during the winter were killed, their | Crystals, whose carriage was drawn by six milk white steeds, manned our ropes and drew our carriage and we just marched and evoluted and had a fine time of it. The line of march was two hours and fifteen minutes long, but we marched on sheet asphalt all the way, for, as I've remarked, this is a great town. I have an idea that very 'ew of the people who lined the streets had ever seen a fire company do any fancy drilling, for as we chasseed around, balanced to corners, dos-a-dosed, marched sideways and backwards. tied ourselves up into double bow knots and then untied ourselves with neatness and dispatch, we created a sensation and were cheered to the echo.

There were sixteen Scranton companies in line,—seven engine companies, eight hose companies and one hook and ladder company. The department is an efficient one, with good discipline and strong esprit de corps. The elaborate decorations along the line of march and the hearty and frequent cheers given the different companies showed that the firemen have a hold on the hearts of the people of Scranton.

The Scranton Times has this to say of our dog Jim:

"Bringing up in the rear of Monhagen Hose Company was their mascot, a greyhound. The dog was attired in a flannel garment to match the uniform of the company, and was

"Colored members" is particularly good. It has so set up Dolly and Alex that there will be no living with them when we get back. They're wrangling already as to which shall run for foreman and which for president at the next election.

The parade was reviewed by city officials, department officers and visitors, from a stand at the corner of Spruce and Washington streets, where the parade was disbanded.

Mayor Connell, assisted by Mayor Hendricks, of Carbondale, held a reception in the municipal building, which our guests and honorary members took in. The fellows who had marched had too much of an appetite to fool away time on city officials when there was a good supper waiting at the hotol.

A big excursion came down from Binghamton to-day. The department officers and many firemen were in the party, and we met and renewed acquaintances with many old
